

DESCRIPTION

New generation devices are starting to use the USB 3.1 Type C technology. KSIX Adapter is the best solution for you to be able to communicate your current devices with your new generation device with this technology. The USB 3.0 to USB 3.1 Type C Adapter allows you to connect a USB Type A cable to any new generation device with a USB 3.1 Type C port. You will be able to use/communicate any of your current devices with your new generation device. Use the adapter to connect flash drives, travel chargers, cameras, power banks, mobile devices, sync & charge cables, etc. How to use Plug the adapter USB 3.1 Type C end into the USB 3.1 Type C port of your new generation device (e.g. MacBook). Then plug your standard device into the adapter USB Type A port using a USB Type A cable.
