

DESCRIPTION

The cutting and personalization plotter machine KSIX Mini allows you to cut front and back screen protectors for any terminal or device. Fast, easy to use and with a compact design that adapts to any space, it cuts the protectors in the right size with the highest precision and in the shortest time possible. It incorporates its own app, which is continuously updated to offer cuts for the latest device models on the market. The best solution to avoid unnecessary overstock and always have universal consumables compatible with any terminal. Furthermore, it will take up minimum space in your point of sale.

Protectors on the spot

The wide range of devices offered by the app will allow you to create protectors up to 20 cm wide for any smartphone model, such as iPhone 14, Samsung Galaxy S22, Xiaomi 12X, Oppo Find X5..., smartwatches such as Apple Watch Series, Samsung Galaxy Watch 4, Xiaomi Watch S1 Active..., or tablets up to 11". An endless number of possibilities in the same machine with which you will save space in your own store while allowing you to generate material based on the current demand.

Compatible with all types of films

This cutting plotter has been designed to cut different types of materials such as all those offered by KSIX: KSIX Extra-Strong Films, KSIX UV Films, KSIX Antibacterial Films, KSIX Flexy Films... Protectors suitable for all screens, scratch resistant and that fit perfectly to the screen height and definition. Furthermore, it also provides cuts for back protectors customized with your own images or designs.

Integrated Android App

This KSIX hydrogel cutting plotter with WiFi connection is managed through its own App, which comes integrated into the machine itself, without the need for extra devices. Our team is constantly working on updating all the new device brands and models that are released on the market, which are instantly updated on the machine without the need to do anything. In addition, this plotter is available in more than 80 languages.

Color HD touch screen

Our cutting machine has a 5.5" HD color touch screen from which you can select the cutting system, the device model and the type of cut, among many other settings. From this screen you can control the cutting of both front and back hydrogel protectors. Furthermore, it incorporates an intuitive interface that will allow you to operate the machine in the easiest way possible.

Maximum precision and cutting speed

Its high precision tungsten steel blade of ± 0.1 MM and cutting speed of approximately 80 mm/s can achieve optimal results in a few seconds. In addition, its built-in smart sensor can adjust the blade to avoid any movements during the cutting process.

Compact and space-saving design

This MINI cutting plotter features a modern and minimalistic design, perfect for showcasing it in your own store thanks to its finishes and its blue color. A machine that takes up minimal space thanks to its dimensions of 42 x 18.5 x 12.8 cm and is very easy to move thanks to its weight of only 5.4 kg.
