

DESCRIPTION

With this KSIX wall charger you can charge all your devices at full speed thanks to its charging power of up to 25 W. It incorporates PPS and Power Delivery technologies, which provide fast, safe and efficient charging for all compatible devices. With a USB-C charging port, the standard of compatibility in the market. Efficiency and power go hand in hand with this charger.

PPS: safe and efficient charging

This wall charger incorporates PPS smart charging technology, offering exceptional benefits for all your devices. This technology intelligently adjusts the charging current, extending battery life and ensuring optimal charging. It is compatible with high-end smartphones from brands such as Samsung, LG, Google, Xiaomi, Oppo, among others.

Fast charge with Power Delivery

With this wall charger you will be able to charge your devices quickly thanks to its supported charging power of up to 25 W and the incorporation of the smart Power Delivery technology. This technology provides much faster and more efficient charging than conventional chargers. Power Delivery is compatible with smartphones from renowned brands such as Apple, Samsung, Xiaomi, Huawei, Oppo, among many others. With this charger you will be able to charge an iPhone 12 mini to 50% in just 30 minutes*.

*This data is an approximate estimation. Data may vary depending on the state of the smartphone's battery, as well as environmental conditions.

Full compatibility

This wall charger incorporates a USB-C port, the standard of compatibility in the market, with which you can charge any compatible device regardless of its brand. From smartphones to tablets, headphones and many more. One charger, multiple possibilities.

Minimalist and safe design

The minimalist design in white color of this wall charger makes it elegant and discreet. In addition, it is ergonomic, lightweight and easily transportable, perfect for carrying anywhere. It is made of a highly resistant flame retardant material, guaranteeing a charge with an unbeatable safety.
