

DESCRIPTION

The KSIX Glory ceiling light display, made from 100% recyclable cardboard, is the perfect tool to showcase this product at any selling point. Very easy to install thanks to its patented self-assembly system. In addition, it incorporates sales pitches and visual content to attract the final customer and boost sales.

Customised design

The 148 x 46 x 50,5 cm POS display is specially designed to display KSIX Glory ceiling lights in the best possible way. It has 3 shelves, with capacity for 4 panels on the 2 lower shelves and 2 panels on the upper shelf. In addition, it incorporates a cardboard plate at its top with the most important attributes of the product.

Patented assembly system

Its installation is quick and easy thanks to its patented automatic assembly system. In just 12 seconds the display is ready for the selling point; all without the need for tools or adhesives. It also comes with assembly instructions to make this task even easier.

A sale-increasing tool

This display, specially designed for the KSIX Glory ceiling light, clearly communicates its functionalities and differential points through written and visual sales arguments.

Sustainable material

Made from 75% recycled cardboard and 25% from FSC-certified forests, this display is environmentally friendly. In addition, it is 100% recyclable and free of plastics and solvents.
