

DESCRIPTION

The Contact wired earphones offer convenience and practicality for those who want an unplugged option without worrying about battery status. They feature a built-in microphone and multifunction control so you can manage your calls and music easily and intuitively. With a 1,2 meter long cable and 3.5 mm Jack connector, offering compatibility with a wide variety of devices.

Total control with built-in microphone

The Contact wired earphones feature a built-in microphone so you can hold phone conversations in total comfort. In addition, thanks to its multifunction control, you can answer and reject calls, as well as skipping songs and adjusting the volume level with just one button.

Anti-tangle 3.5 mm Jack cable

The 1,2 meter long cable of these earphones has been designed to resist annoying tangles and forget about knots when storing them in your pocket, purse or backpack. Thanks to their 3.5 mm Jack connector, they are compatible with a wide variety of devices, from smartphones to tablets, computers, speakers and more.

Resistant and durable

The Contact earphones are made of PTE and ABS, resistant and quality materials that guarantee a long lifespan. They also feature IPX3 protection rating that makes them resistant to sweat and rain, making them the perfect choice for outdoor activities and workouts. Enjoy your music and calls at all times, no matter the pla

The most comfortable sound

Enjoy a high quality stereo audio with these earphones and experience crisp, clear sound when listening to music and making calls. In addition, for extra comfort, they include 3 pairs of earpads in different sizes to fit any ear.
