

DESCRIPTION

Experience fast, safe and efficient charging for all your devices with the KSIX multi-port wall charger. Thanks to GaN, PPS and Power Delivery technologies, this up to 65W unit gives you exceptional performance. With 3 interchangeable plugs, you can use it in any country you visit. Its compact design makes it easy to take with you anywhere in the world.

100% battery in less time

Charge all your devices at full speed thanks to the 65W of power built into this 3-port charger: 2 of them with USB-C input and 1 with USB-A input.

Discover all the possibilities offered by this multiport charger from KSIX. In case of simultaneous use of 2 or more ports, the power will be distributed between the connected devices.

- USB-C (1): max. 65 W (PD)
- USB-C (2): max. 27 W (PD)
- USB-A: max. 18 W (PPS)

Compatible in hundreds of countries

With interchangeable adapters for UK/US/EU plugs and international voltage compatibility, this charger makes it easy to charge multiple devices anywhere in the world. Changing the plug is easy: simply press and hold the button and replace it as needed.

- EU Connector: Germany, Denmark, Spain, Netherlands, Egypt, Poland, Russia
- UK Connector: United Kingdom, Hong Kong, India, Vietnam, Singapore
- US Connector: USA, Canada, China, Japan, Thailand, Mexico, Brazil

GaN: materials of the latest technology

Powered by advanced GaN technology, our charger is designed with gallium nitride components. This innovation allows the charger to maintain a compact and lightweight design without sacrificing performance. It also provides more efficient charging compared to conventional chargers, which reduces device heating.

PPS: intelligent dynamic charging

Programmable Power Supply technology optimises the charger's charging efficiency by dynamically adjusting power output in real time according to the specific needs of the device. This innovation is compatible with a wide range of devices, including models such as Samsung Galaxy S20, S21, S22 and later; Samsung Galaxy Note 10+; Samsung Note 20 and later; Google Pixel 4 and later, and more. Even if your device does not support PPS technology, our charger is still compatible for safe and fast charging.

Power Delivery: fast and efficient

The charger features Power Delivery technology, designed to quickly and efficiently charge Apple, Samsung, Xiaomi devices, as well as other models from brands such as Google, Realme, OnePlus, and more. This technology delivers more power than conventional chargers, allowing you to charge your devices at the fastest possible speed.

Charge all your devices

With USB-C and USB-A ports, this charger offers maximum compatibility with your devices. Simply plug your cable (not included) into the corresponding port and unleash its power on iOS and Android devices. From smartphones and tablets to wireless headphones and even laptops, charge all your devices without worrying about battery damage or overheating. Even if your device doesn't support ultra-fast charging, the charger will automatically adjust the voltage to match its power.

TECHNICAL SPECIFICATIONS.
