

## DESCRIPTION

The Kingsmith WalkingPad G1 treadmill with folding handrail offers a new way to exercise from the comfort of your home. Thanks to its patented folding design, you can easily store it in any corner. Equipped with a silent Brushless motor, it allows you to train without disturbing others, reaching up to 12 km/h. In addition, its LED panel and KS Fit app, compatible with smartphones, tablets and even Apple Watch, make it very easy to control and consult the data of your sessions.

### Patented, complete folding design

The G1 treadmill features a patented folding system that redefines the practicality and safety of exercising at home. Its 2-roller folding technology is capable of folding the treadmill 180° in the opposite direction, making it easy to use and allowing for convenient storage even in tight spaces. In addition, the side handrails also incorporate a folding mechanism that provides an extra layer of safety, deploying quickly in emergency situations during exercise, and folds away easily for efficient storage when not in use.

### Premium LED display

It incorporates a high brightness digital control panel, consisting of 4 displays with 8 LED segments on each, which clearly shows time, speed, distance, calories and other fitness data. In addition, this panel is equipped with an innovative rotary control that allows you to adjust the start and speed with simple movements, allowing you to track your exercise status in real time.

### Silent exercise up to 12 km/h

Its 1.0 HP brushless brushless motor offers a speed range of 1 to 12 km/h for a demanding and super-quiet workout, generating less than 55 dB of noise. Control the speed manually via the KS Fit app or via the built-in LED display and work out day or night without worrying about disturbing other residents or neighbours.

### App available for mobile, tablet and Apple Watch

Download the KS Fit app available for iOS and Android and synchronise it with the treadmill via Bluetooth, from your smartphone, tablet or Apple Watch and regulate the speed manually and have more exhaustive control over the exercise you do. You can check the distance covered, steps taken, calories burned and much more.

### Multi-layer tread surface

Equipped with a 44 cm tread area and its high-performance flexible shock-absorbing layering system, this treadmill offers an unparalleled home exercise experience. Its technology reduces impact vibration between its four layers, significantly improving running comfort and ensuring user safety.

## TECHNICAL SPECIFICATIONS.

Weight

**43 kg**

Dimensions

<b>98,3 x 74,4 x 19,4 cm</b>	
Color	<b>Black</b>
Power	<b>220-240V</b>
Connectivity	<b>Wireless compatible+ WiFi</b>
Power	<b>750 W</b>
APP	<b>KS Fit</b>
Shape	<b>Premium</b>
Display	<b>LED</b>
Maximum weight supported	<b>110 kg</b>
Noise	<b>Silent</b>
Storage	<b>Foldable</b>
