

DESCRIPTION

Keep track of your health and activity with the Amazfit Active. This smartwatch offers you complete guidance from planning your workouts thanks to Artificial Intelligence (AI) to tracking your routines through its GPS. It will also keep you in touch with friends and family thanks to its hands-free function or notifications while adding a touch of style to your day-to-day life.

Premium HD AMOLED display

Immerse yourself in a vivid experience with the 1.75' HD AMOLED display, which offers an impressive 73% screen-to-body ratio and a pixel density of 341 IPP. Plus, its 2.5D tempered glass screen with AF coating blends seamlessly into the design, giving you total screen immersion.

Up to 14 days of autonomy

With a battery life of up to 14 days in normal use, 30 days in sleep mode, 10 days in heavy use and 16 hours with continuous GPS, your Amazfit Active is always ready to be there for meetings, special moments and long journeys.

Precise GPS tracking

With Amazfit Active, every city corner and outdoor trail is recorded on your route thanks to its GPS connected to 5 satellite positioning systems. Just import the route file from the Zepp app and enjoy accurate and reliable navigation on your outdoor adventures.

AI-personalised plans

Turn AI into your personal trainer with Zepp Coach, tailoring training plans to your individual schedule, requirements and goals. It will guide you when it's the right time to step up your routine or take a well-deserved break. Plus, the watch can auto-detect 7 sporting movements, in and out of the water, to help you move faster. Set the watch to read your sports data in real time, and you won't even have to lift your wrist to check your performance.

24/7 health and sleep monitoring

Explore your daily recovery through the Readiness feature. Based on factors such as your resting heart rate, heart rate variability, breathing quality and temperature, this personalised wake-up Readiness score synchronises with your physical and mental wellbeing. In addition, the AI-based Zepp Aura sleep and relaxation service generates soundscapes that intelligently adapt based on biometric readings from your Amazfit smartwatch, providing detailed reports, tips and a chatbot to answer wellness questions.

Calls and notifications

By connecting to your phone via Wireless, you can answer or make calls, receive notifications from your favourite apps, control the camera and music, and more. You can also store music directly on the watch, so you can enjoy your favourite tracks without having to rely on your smartphone.
