

DESCRIPTION

Amazfit Balance is your premium companion for smarter work-life-health-exercise balance. With accurate and personalised health tracking, science-backed fitness guidance and next-generation AI-powered health services, it helps you recharge and face daily challenges with vitality. A watch that also allows you to make and receive calls and make payments directly from your screen.

Premium HD AMOLED experience

Inspired by the sophistication of high-end vehicles and the elegance of classic watches, the Amazfit Balance combines sleek angles with a lightweight design, weighing just 35g. Its magnified AMOLED HD display, surrounded by an industry-leading anti-glare glass bezel, offers an exceptionally high 480x480 resolution and impressive brightness of up to 1,500 nit.

Up to 14 days of autonomy

With a battery life of up to 14 days in normal use, 25 days in sleep mode, 7 days in heavy use and 26 hours with continuous GPS, your Amazfit Balance will always be ready to help you exceed all your fitness, sport, professional and personal goals.

Highest precision GPS

Discover GPS tracking on the smartwatch, offering industry-leading accuracy even in dense urban or overgrown environments. Thanks to the dual-band, circularly polarised GPS antenna, interference is significantly reduced, allowing the use of signals from 6 satellite systems. Import your routes from the Zepp app and enjoy accurate real-time navigation directly from your wrist.

AI-personalised plans

Turn AI into your personal trainer with Zepp Coach, tailoring training plans to your individual schedule, requirements and goals. It will guide you when it's the right time to step up your routine or take a well-deserved break. Plus, the watch can auto-detect sporting movements, in and out of the water, to help you move faster. Set the watch to read your sports data in real time, and you won't even have to lift your wrist to check your performance.

Accurate health and sleep monitoring

In addition to accurately tracking health data such as heart rate, blood oxygen, stress level and sleep, Amazfit Balance offers the convenience of quickly measuring eight body composition metrics right from your wrist. These metrics include body fat, skeletal muscle, muscle mass, water percentage, bone mass, protein percentage, body mass index (BMI) and basal metabolism. In addition, the AI-based Zepp Aura sleep and relaxation service provides detailed reports, tips and a chatbot to answer wellness questions.

Payments by watch

Thanks to the partnership between Amazfit and Mastercard, and the integration of NFC technology, Zepp Pay offers you the possibility to link up to eight bank cards to your Amazfit Balance. This allows you to make secure contactless payments directly from your wrist, protected by password. In case your bank is not compatible, you can sign up for a Curve account, a smart digital wallet that

includes both a digital and physical debit card. To use Zepp Pay through Curve, simply add your bank card to Curve and then link your Curve card to Zepp Pay.

Calls and notifications

By connecting your phone via Wireless, the Amazfit Balance allows you to manage calls, both to make and answer them. You can also receive notifications from your favourite apps, control the camera and music, and perform other additional functions. You also have the option to store music directly on the watch so you can enjoy your favourite tunes without relying on your smartphone.
