

DESCRIPTION

Equipped with a USB-C port, these wired, in-ear earphones ensure fast and stable operation for a wide range of smartphones, without the need for tethering. They feature a built-in microphone for answering and making calls, and a controller to manage your music with a few simple taps. Ideal for both professional and leisure activities, these headphones combine functionality and comfort in a compact, super-lightweight design.

For Android devices and iPhone 15

Its integrated USB-C port allows you to connect your earphones directly to your devices without the need for extra adapters. Listen to music from your smartphone, iPad or even laptop with these comfortable KSIX earphones.

Built-in microphone

This USB-C earphones features a built-in microphone for making calls or getting the best audio quality out of your recordings.

Easy and intuitive controller

Its remote control integrated in the cable itself, allows you to easily manage music and calls, fulfilling your needs in play/pause songs, volume control, change songs, answer/reject calls.

In-ear design

The ergonomic and comfortable design of these earphones reduces discomfort during prolonged use by fitting comfortably inside the ear, offering an excellent secure fit.

Small, light and ergonomic

These lightweight, portable earphones are ideal for travelling, taking the bus, running, climbing and other activities. Plus, they feature a cord that's easy to roll up, carry and prevents tangles in everyday use.
