

DESCRIPTION

WINNER GRIZZLY 3K Pickleball is a racket that provides excellent performance on the court thanks to a combination of high quality materials and technologies. It has been designed for advanced to intermediate level players.

Weighing 225 grams (/ -10), the Grizzly 3K has been manufactured with a carbon frame and a combination of 20mm thick polymer honeycomb and 3k carbon fibre for the blades, for extraordinary impact resistance, durability and stiffness.

Designed to improve the performance and sensations on court of the most professional players. Its technology provides greater power, resistance and control in the stroke.

Ball certified by the USAPA (USA Pickleball Association) to be able to compete in any official tournament.
